Superfos standard selected Hot filling:

pantone colours.

Hot temperatures:

The material chosen has a very good heat resistance and the packaging is suitable for hot filling. Notably, plastic packaging become flexible when subjected to hot filling temperatures and care must be taken in relation to stacking immediately after hot filling. The RPC Superfos packaging must be tested by the customer with the actual product before approval for use at hot temperatures

Cold temperatures:

Freezing conditions require special resins available on request. The RPC Superfos packaging must be tested by the customer with the actual product before approval for use at low temperatures
